

Chinwei Wong

A seasoned product designer who wears many hats and drives hard business results

JUL 2016 - CURRENT

Product Designer

Boomerang Commerce

Lead Designer for Boomerang's core product offering, the Price Performance Management, a tool which empowers retailers with price intelligence and the ability to create strategies to automate pricing decisions and help merchants manage their ads and operations via exceptions.

Delivered a redesign of PPM, which helped Boomerang win it's first RFP with US's largest electronic retailer with a deal size of \$1M. I owned the redesign end-to-end, from conducting user validation sessions, to the design and implementation of the UI.

Worked with our Head of Product and sales team to deliver an MVP to help Boomerang enter a new market with a product that empower brands with market intelligence and automation of their operations and advertising on Amazon.

Drove and partnered with developers to build Boomerang's UI library so development teams can rapidly iterate on functionality and deliver the product to market.

SEP 2014 - JUL 2016

UX Designer

TOTVS Labs

Built and shipped Carol.ai, an end-to-end data platform that gathers internal and external data to power actionable intelligence across TOTVS's suite of products.

Led customer interviews and rapidly iterated using prototypes ranging from wireframes to high fidelity interactive prototypes built in HTML/CSS and modern frontend frameworks like Vue and Angular.

Evangelized and implemented a more efficient way of collaborating between PMs, designers and engineers.

MAR 2011 - JUN 2013

UI Designer / Developer

Mint Interactive

Worked with clients across numerous industries including retail, manufacturing and hospitality to execute their digital campaigns and expand their web presence.

Designed websites and other digital marketing collateral in Adobe Creative Suite (Photoshop, Fireworks, Illustrator).

Built the user interface and interactivity for digital projects in HTML/CSS/JS/Actionscript.

SEP 2010 - FEB 2011

User Research Assistant

KEIO-NUS CUTE Center

Conducted domain and user research for multiplayer game installation designed to help bond intergenerational family members.

Designed the user interface for a software mimicking human conversation using artificial intelligence.

Education

GRADUATED 2014 (GPA 4.03)

Carnegie Mellon University

Masters in Human-Computer Interaction

GRADUATED 2010

National University of Singapore

Bachelor of Science (Chemistry)
